Contract Change Order

Current   Past

Coming Soon!

Free Form Fields that can be completed by the user then converted into a PDF, sent to HelloSign for execution if desired.

Then saved under "past" and sent to a standalone folder in documents for records after executed.

The same technical concepts will apply both here, "Contract Status" (already built), and in Daily Observations

All will be free form fields, some are additive where we can calculate the value for the user
